

SMC CLIMBERS' GUIDES Carry pouches

Designed to SMC Climbers' Guide specifications, these pouches have been made by the leading manufacturer of similar pouches for other climbing guidebook sizes and carry the Rab equipment brand.

A carry loop at either end enables the pouch to be clipped to the harness, or clipped to a sling and worn bandolier style slung around the shoulder. Tuck-in flaps together with an elastic retainer keep the guidebook secure and the pouch is zipped from the top to the bottom, to prevent snagging on the page marker ribbon.

Constructed from double layer, medium weight proofed nylon, the pouch offers good protection in wet conditions, although it is not fully waterproof. Using the pouch will also protect your guide from serious damage when bundled inside your rucksack with other equipment.

This indispensable piece of kit is available at a price of £12.00, including postage and packing. Carabiner and guidebook not included!

Scottish Mountaineering Trust (Publications) Ltd is offering this SMC Climbers' Guide pouch for sale at a price of £12.00 including p&p.

Please fill in your name and address clearly below and send with a cheque to:
Tom Prentice, 43 Thorncliffe Gardens, Glasgow G41 2DE.

*** Please make cheques payable to Scottish Mountaineering Trust (Publications) Ltd.
